

AmeriBolt

Your Single Source for
Studs, Threading, Forging and Machining

AmeriBolt, Inc. was built on speed and service, and while we have significantly upgraded our capacity and our capabilities - our commitment to superior customer service from quotation to delivery remains the very foundation of our business. *Let us show you the AmeriBolt difference: speed, quality and fast service.*

ALL-THREAD STUDS

Your source for studs. We make all-thread studs in a variety of materials, up to 4" diameter, to meet your specifications. We offer a variety of finishes including plain, zinc plated (clear and yellow), hot-dip galvanized, mechanical galvanized, cadmium plated (clear and yellow) and Xylan® or Teflon® coating.

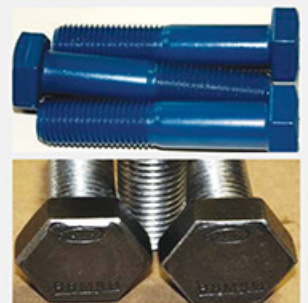

ALLOY | STAINLESS STEEL | LOW CARBON | SUPER ALLOY

HEAVY HEX BOLTS

Your source for heavy hex bolts. Heavy hex bolts up to 4" diameter from a variety of materials to meet your specifications, including ASTM 193 B7, B16, B8, B8M (Class 1 and Class 2), A320 L7, plus many specialty materials. We offer 100% domestic (melted and manufactured in the USA), North American or DFARS compliant - and other imports.

ALLOY | STAINLESS STEEL | SUPER ALLOY

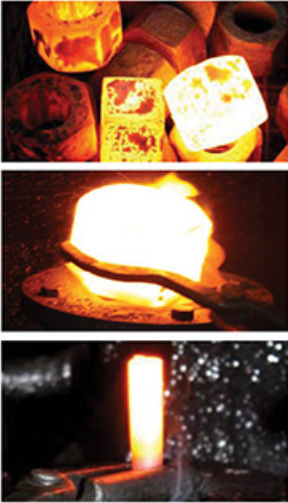

HARDWARE PRODUCTS

Your source for heavy hex nuts and washers. We offer all of the necessary Heavy Hex Nuts to complete your orders in the appropriate material, size and finish. If desired, we can assemble the nuts to your all-thread studs or heavy-hex bolts.

In addition, we have the necessary flat washers and lock washers needed to finish your orders - available in all of the appropriate finishes to match our Studs, Heavy Hex Bolts and Heavy Hex Nuts (or Finished Hex Nuts).

USS, F436 & SAE FLAT WASHERS | LOCK WASHERS
SQUARE PLATE WASHERS (TO YOUR PRINT)

HOT FORGING

Your source for forging. We developed the Forging Department with the goal to better serve our customers with a broader range of 100% domestic manufacturing capabilities, combined with better service and faster delivery. Our Forging Department offers the same wide range of materials that we currently provide as All-Thread Studs, Heavy Hex Bolts, Hex Cap Screws and Heavy Hex Nuts.

Heavy Hex Bolts and Cap Screws can be threaded per the IFI standard - fully threaded as Tap Bolts or threaded to an exact length per your customer's print. We offer the same finishes as our regular all-thread stud products.

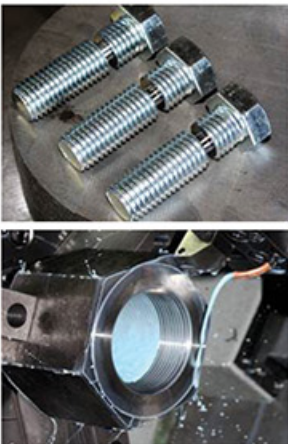

HEAVY HEX NUTS UP TO 4" DIAMETER | HEX BOLTS FROM 3/8" TO 4" DIAMETER

CUSTOM THREADING (OVER TAPPING)

Your source for custom threading. Our Production Department can thread many different types of fasteners to your specification. When you can't wait "3 weeks" for hot-dip galvanized U-bolts, Anchor Bolts, or Studs, we are able to turn hot-dip galvanized specials in 24-48 hours.

RAPID TURNAROUND | ALL GRADES | ALL FINISHES | CUSTOM QUOTES

MACHINING

Your source for custom machining. Our Machining Department offers full CNC lathe, precision machined parts to your exact specifications. We have the staff and the equipment for turning, milling, fabricating, drilling, welding and custom finishing for all of your Stud and Heavy Hex Bolt orders.
